REACH

REACH is a European Union regulation concerning the Registration, Evaluation, Authorisation and restriction of Chemicals. It came into force on 1st June 2007 and replaced a number of European Directives and Regulations with a single system.

REACH applies to substances manufactured or imported into the EU in quantities of 1 tonne or more per year. Generally, it applies to all individual chemical substances on their own, in preparations or in articles (if the substance is intended to be released during normal and reasonably foreseeable conditions of use from an article.

The REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) Regulations 2006 aim to:

- Provide a high level of protection for human health and the he environment
- Make manufacturers and importers responsible for managing risks
- Allow free movement of substances on the EU market
- Enhance the competiveness of the EU chemicals industry
- Promote alternative methods for the assessment of hazards

The new system:

- Requires manufacturers and importers to gather hazard information and assess risks
- Can require the use of some particularly hazardous substances to be authorised
- Restricts the marketing and use of certain chemicals and mixtures

Certification
REACH – Substances of Very High Concern (SVHC)

We confirm that to the best of our knowledge, products supplied by the main suppliers of Eastern Seals (UK) Ltd comply with REACH regulations.
They do not contain any of the listed Substances of Very High Concern (SVHC) – as shown on the initial Candidate list dated 28th October 2008, and the latest up-date to 191 substances published 27th June 2018.
