

REACH Regulation (EC) No. 1907/2006

The European Regulation concerning the registration, evaluation, authorisation and restriction of chemicals ("REACH") provides a special procedure for the handling of substances which are said to bear a very high risk for health and environment. Those substances of very high concern (SVHC) are included in Annex XIV of the REACH regulation. They have been published since October, 2008 in the candidate list of SVHC for Annex XIV of the REACH regulation.

The European Chemical Agency (ECHA) advised on 16th July 2019 that 4 more substances have been added to the candidate list bringing the total to 201. According to our knowledge, no substances listed on the update list of SVHC are contained within Eastern Seals products in concentrations above the threshold limit of 0.1% by weight (1000ppm)

Certification **REACH – Substances of Very High Concern (SVHC)**

We confirm that to the best of our knowledge, products supplied by the main suppliers of Eastern Seals (UK) Ltd comply with REACH regulations.

They do not contain any of the listed Substances of Very High Concern (SVHC) – as shown on the initial Candidate list dated 28th October 2008, and the latest up-date to 201 substances published 16th July 2019.
