

Subject: REACH & RoHS Declaration

REACH

Eastern Seals (UK) Ltd is fully committed to compliance with the European Regulation on the Registration, Evaluation, Authorisation, and Restriction of Chemicals (REACH), as stipulated in EC No. 1907/2006. We prioritise the safety, health, and environmental integrity of our products in alignment with these regulations.

REACH provides a comprehensive framework for managing substances that may pose significant risks to health and the environment, including those classified as Substances of Very High Concern (SVHC) and listed in Annex XIV. The European Chemicals Agency has continually updated the Candidate List for Annex XIV since its inception in October 2008.

We are pleased to confirm that our products, with the exception of certain Peroxide Cured compounds, are sourced from reputable suppliers who comply with REACH regulations. In some of these Peroxide Cured compounds, Dicumyl peroxide is utilised; however, our testing indicates that the levels of Dicumyl peroxide are consistently below the regulatory thresholds or are entirely absent. We maintain ongoing communication with our suppliers to ensure that all materials and substances in our products adhere to the latest REACH standards.

Following the latest updates to the REACH Candidate List of Substances of Very High Concern (SVHC), currently comprising 253 substances, we have reviewed available supplier information and verified that our products (excluding the specific Peroxide Cured compounds mentioned above) do not intentionally contain any SVHCs above the threshold of 0.1% w/w in accordance with Article 33 of REACH Regulation (EC) No. 1907/2006.

We also recognise the importance of compliance with Annex XVII of the REACH regulation, which outlines chemical safety assessment requirements. To this end, we have implemented the necessary measures to ensure that our products meet these regulatory standards.

RoHS

Furthermore, with respect to the Restriction of Hazardous Substances (RoHS), we confirm that our standard sealing compounds comply with European Directives 2011/65/EU (RoHS 2) and (EU) 2015/863 (RoHS 3). This reflects our ongoing commitment to environmental responsibility and the sustainable use of materials.
